

Wir empfehlen Ihnen, die Montageanleitung vor Beginn der Montage sorgfältig zu lesen oder die Montage von speziell geschultem Personal durchführen zu lassen!

Wir empfehlen, sich vor der eigentlichen Montage die Montagevideos anzusehen:

Aufschlüsselung der Komponenten
Stumpfe Umfassungszarge für Ganzglastür

 <p>Zargenprofile</p>	 <p>Schraube 4,5 x 20</p>	 <p>Bandabdeckungen</p>
 <p>Stahlschnalle</p>	 <p>Schraube M5 x 16</p>	 <p>Schraube M4 x 10</p>
 <p>Exzenter</p>	 <p>Magnethalter</p>	 <p>Bandfalzabdeckung</p>
 <p>selbstklebende Abdeckung für die Stirnseite der Zarge OBTUS 1)</p>	 <p>Magnet</p>	 <p>Schraube M4 x 10</p>
 <p>Bandhalterung</p>	 <p>Schraube M5 x 20</p>	 <p>Zargendichtung</p>
 <p>Band</p>	 <p>Turboschraube 7,5 x 102 T30</p>	

1) - wird für die Eckverbindung der Zarge OBTUS verwendet

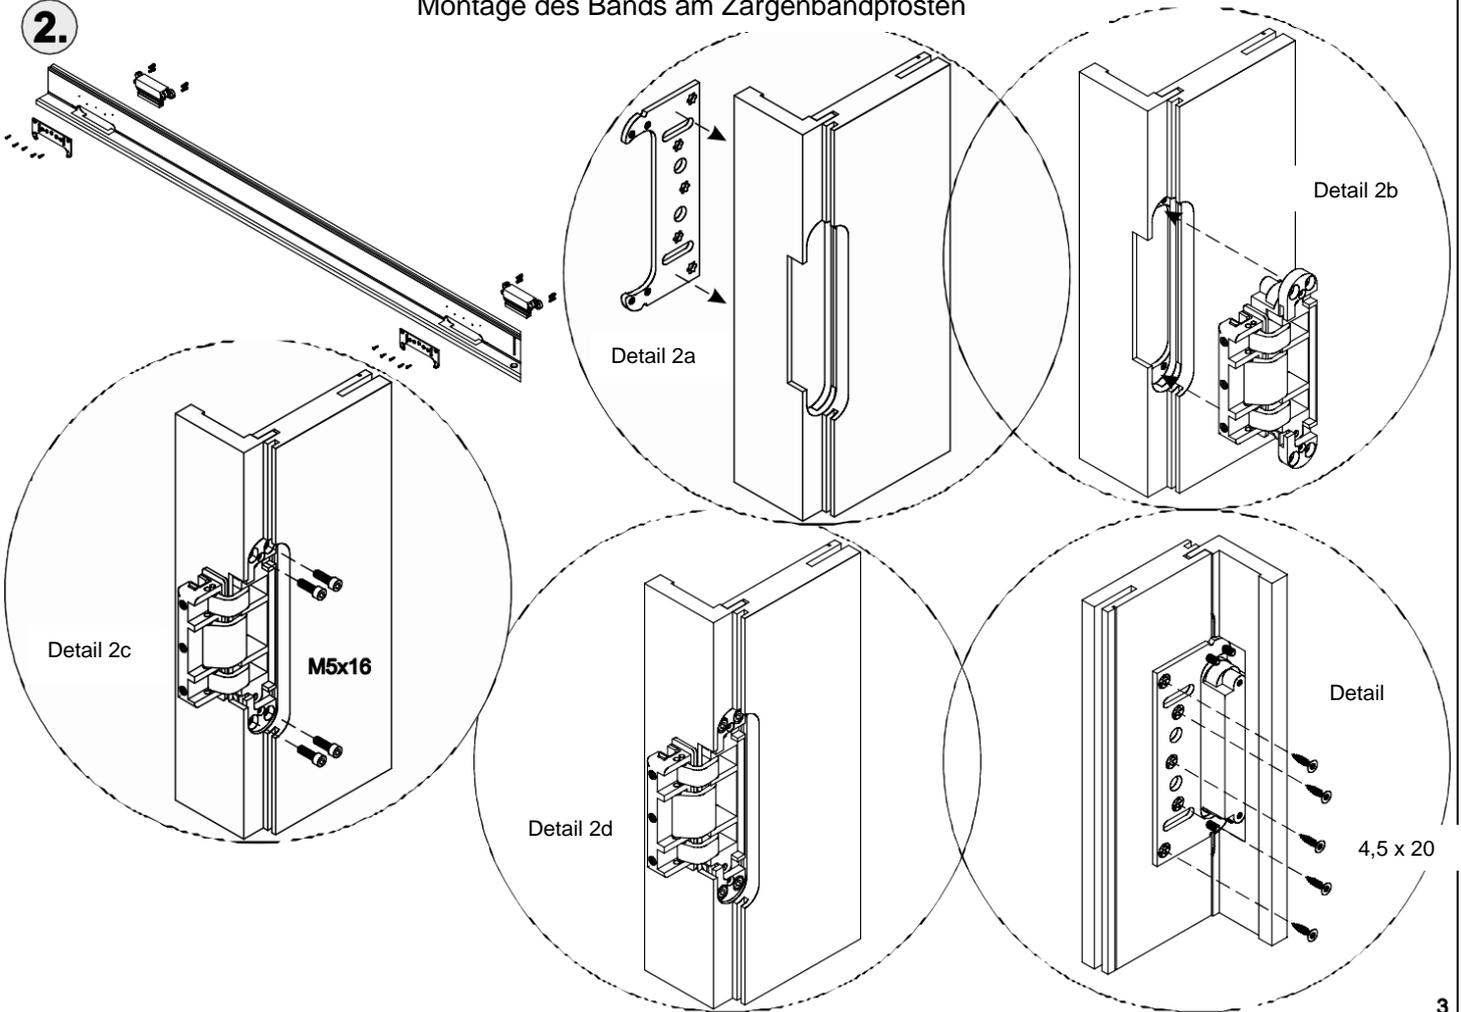

1.

Herausziehen der Zierbekleidungen aus dem Tragrahmen

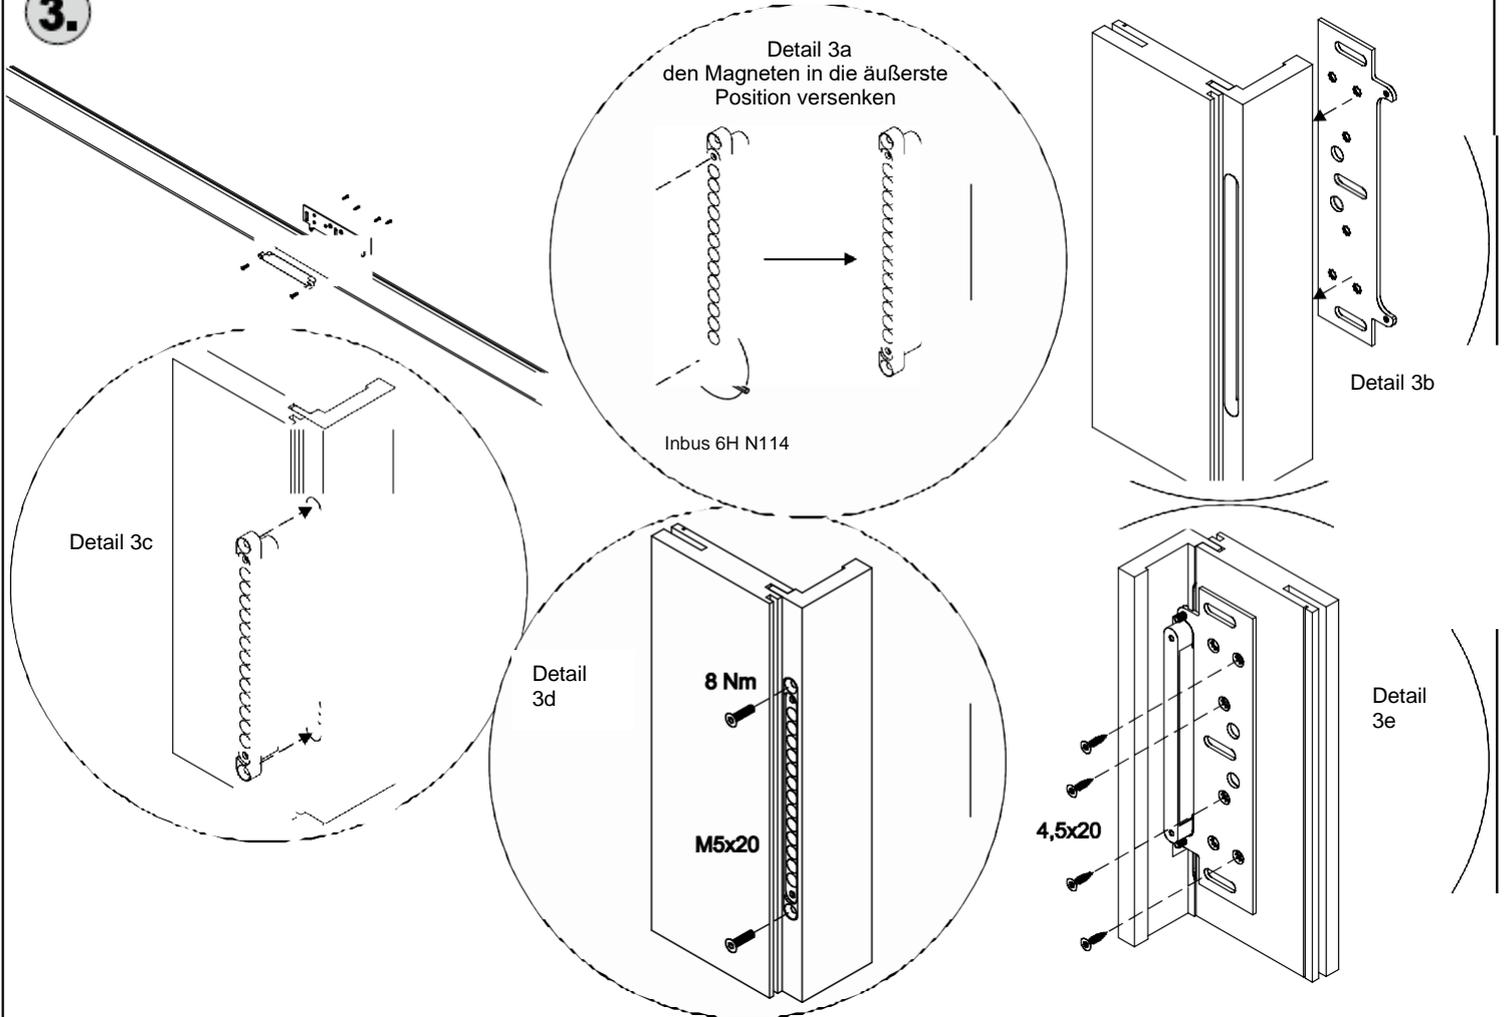

2.

Montage des Bands am Zargenbandpfosten

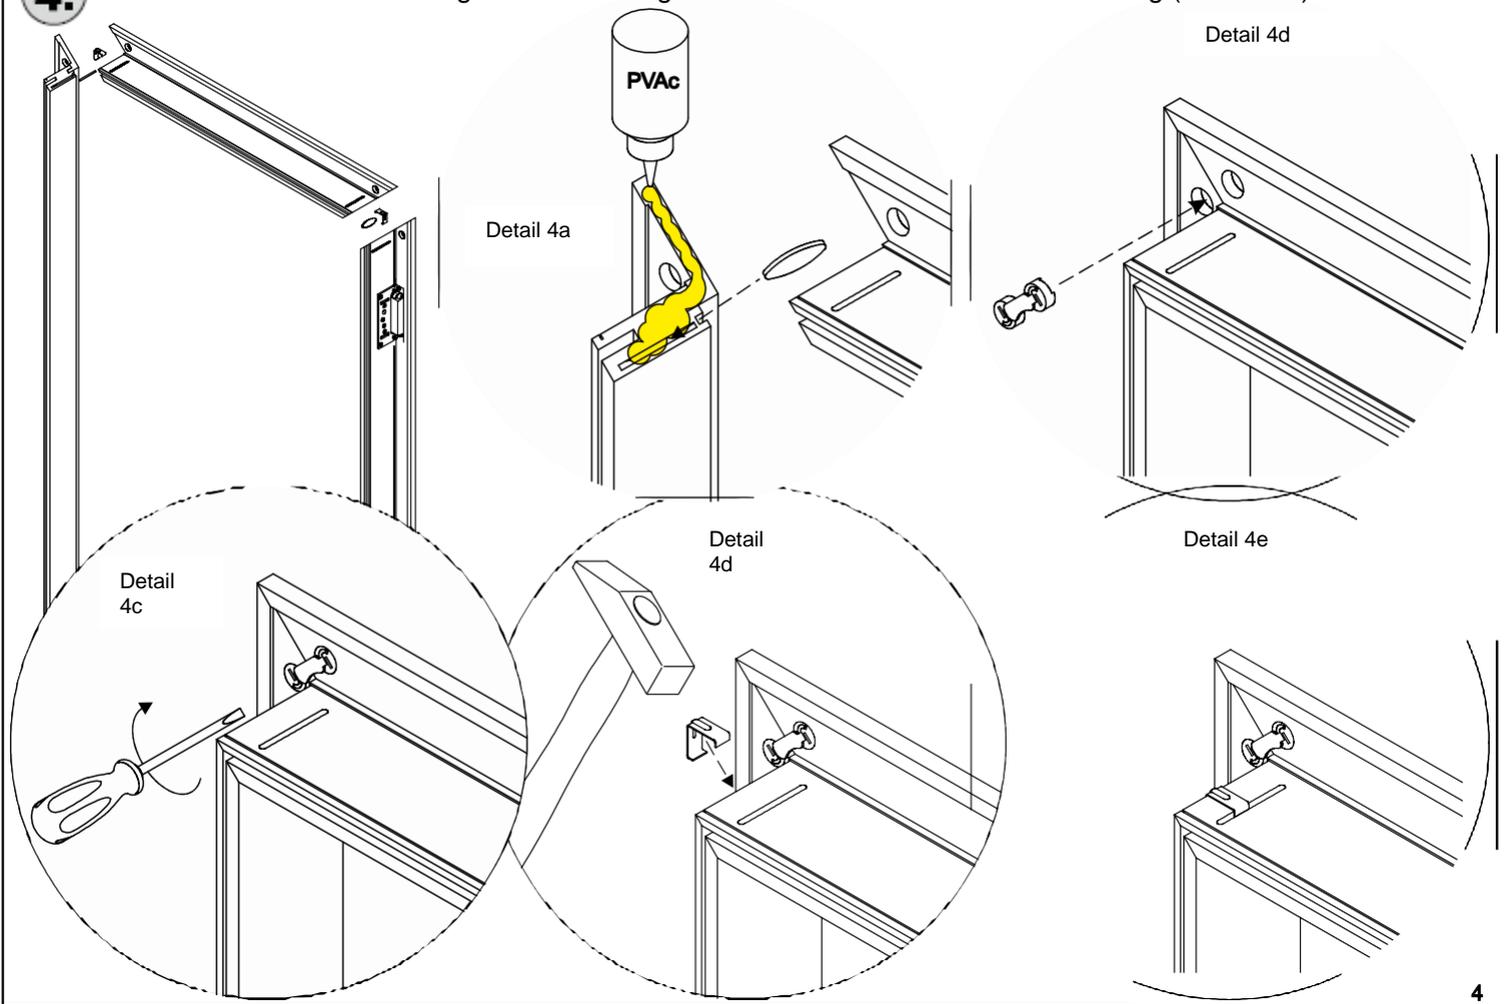

Montage des Magneten am Schlosspfosten

3.

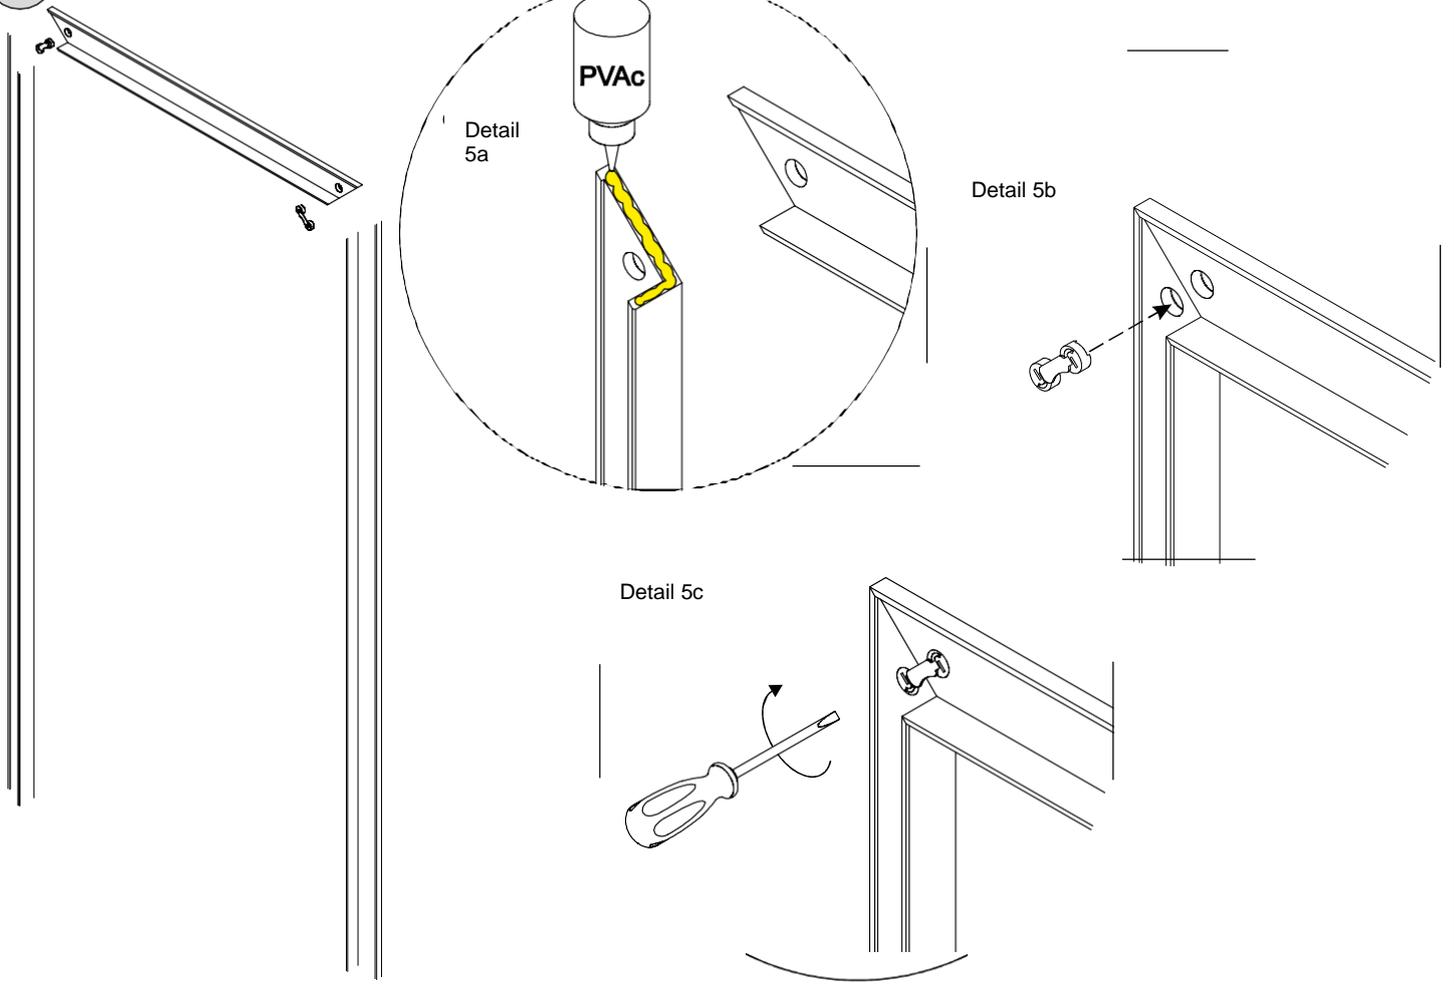

Eckverbindung des Bekleidungsrahmens und des Futters auf Gehung (NORMAL)

4.

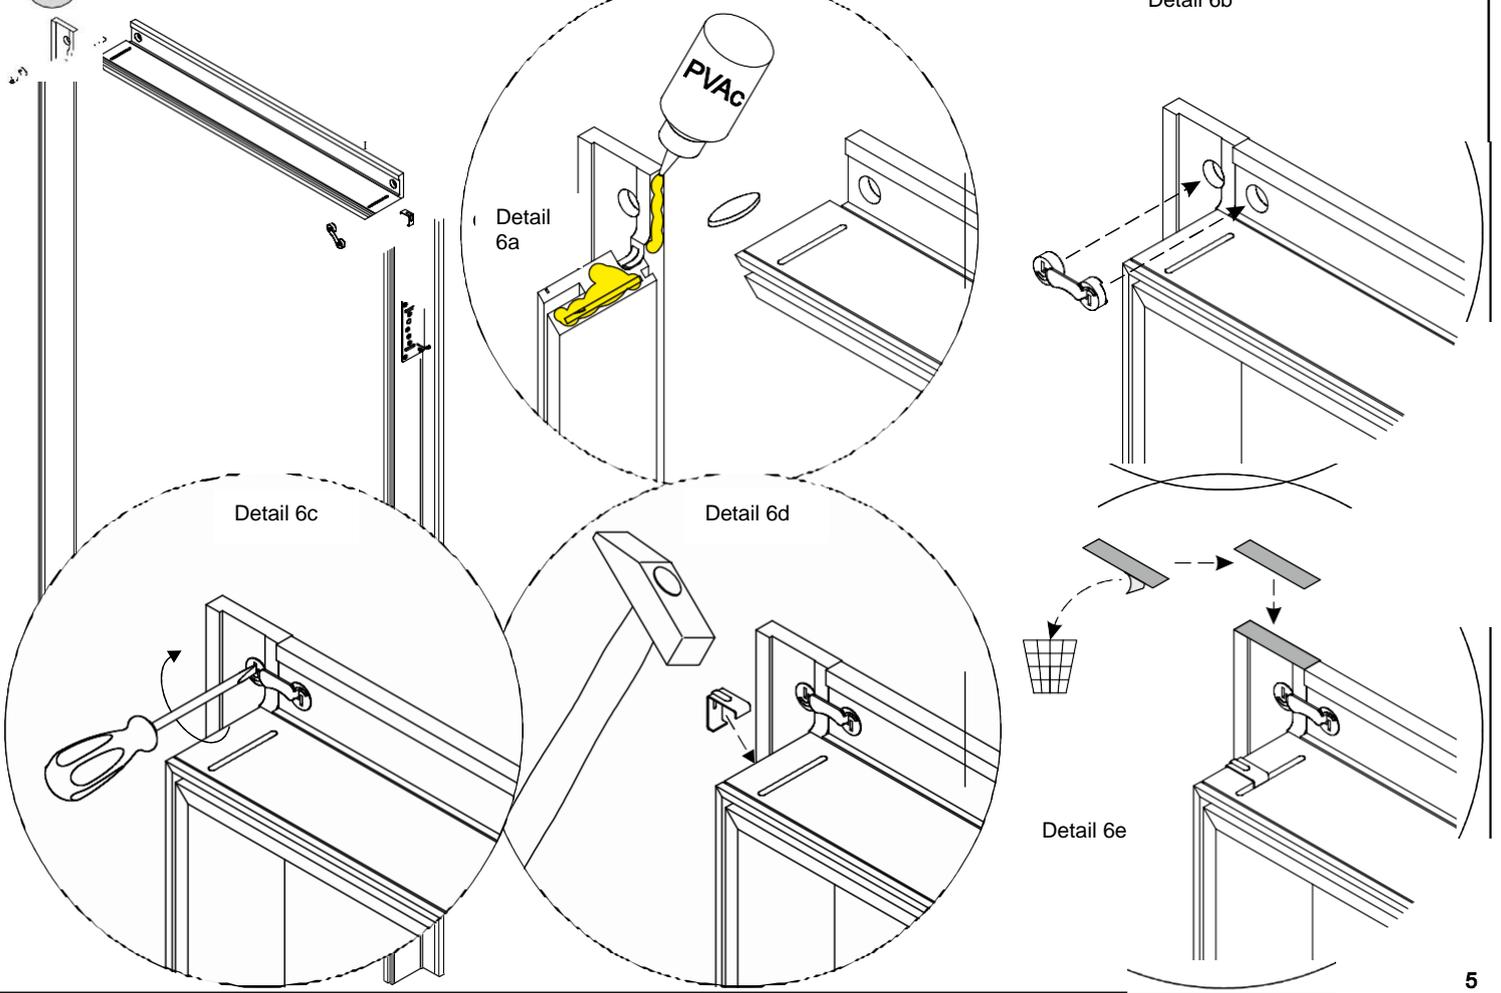

Eckverbindung des Zierbekleidungsrahmens auf Gehung (NORMAL)

5.

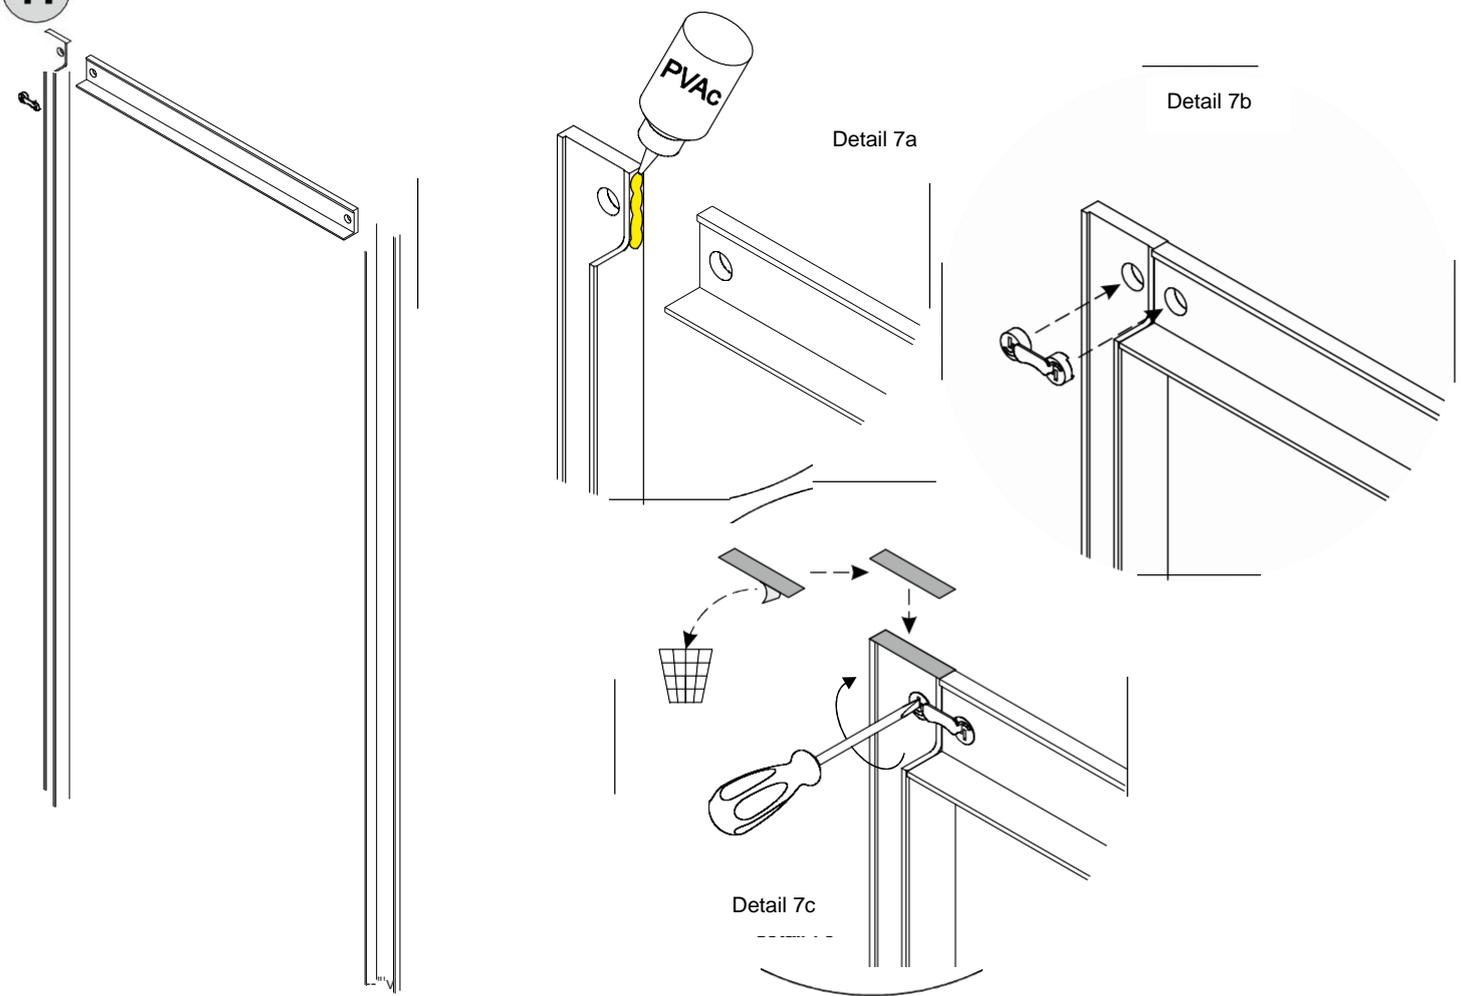

Stumpfe Eckverbindung des Bekleidungsrahmens und des Futter (OBTUS)

6.

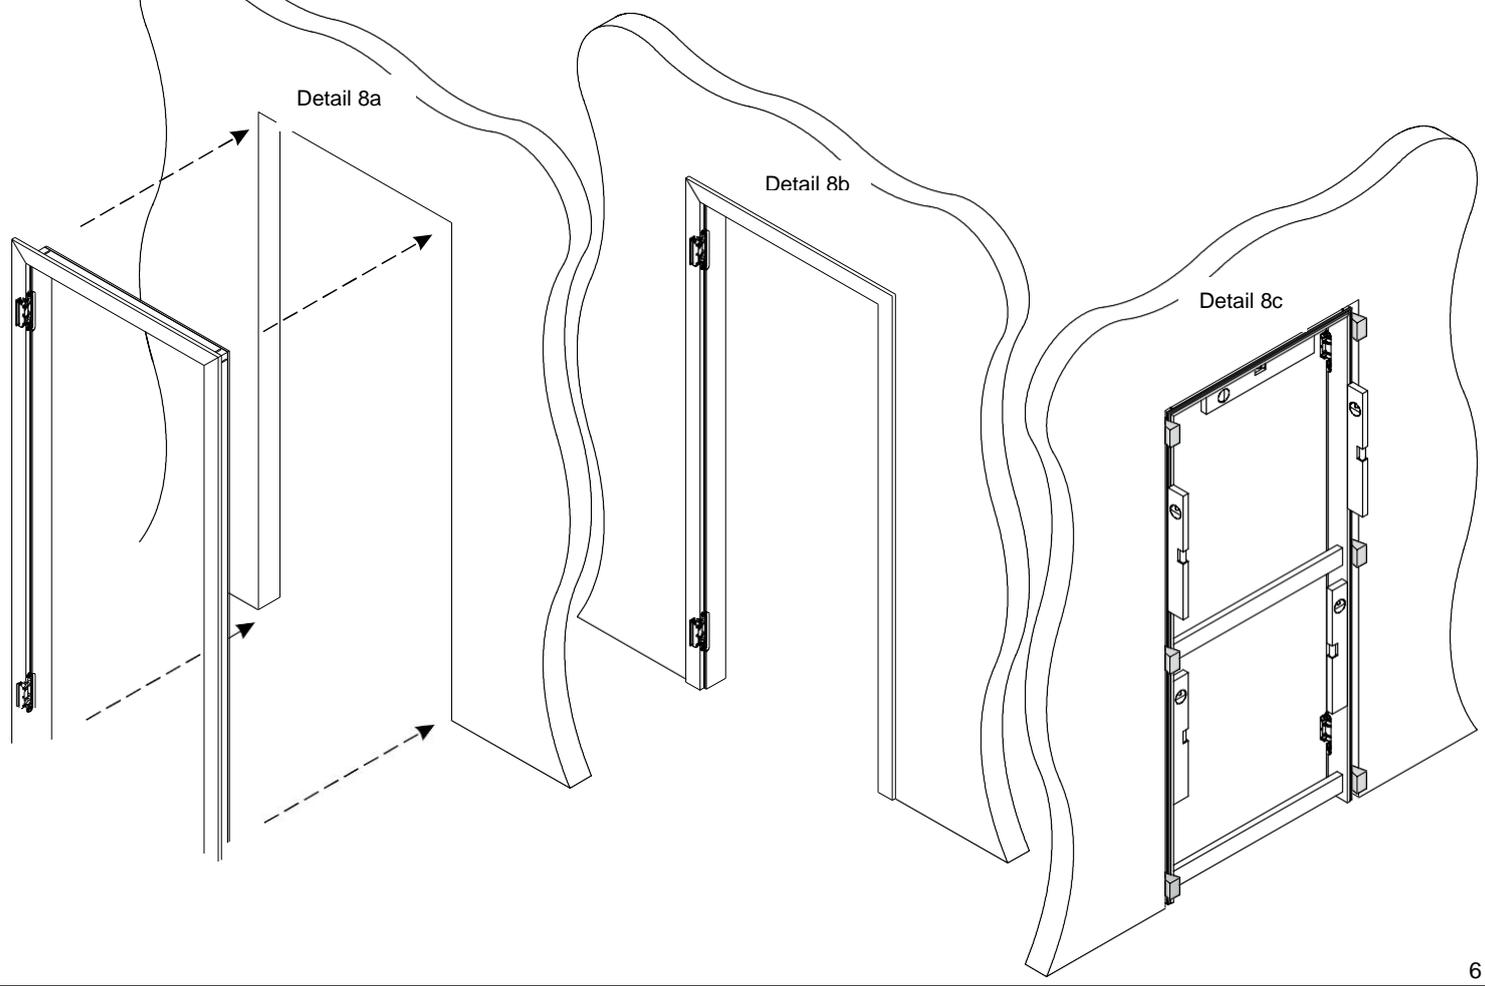

Stumpfe Eckverbindung des Zierbekleidungsrahmens (OBTUS)

7.

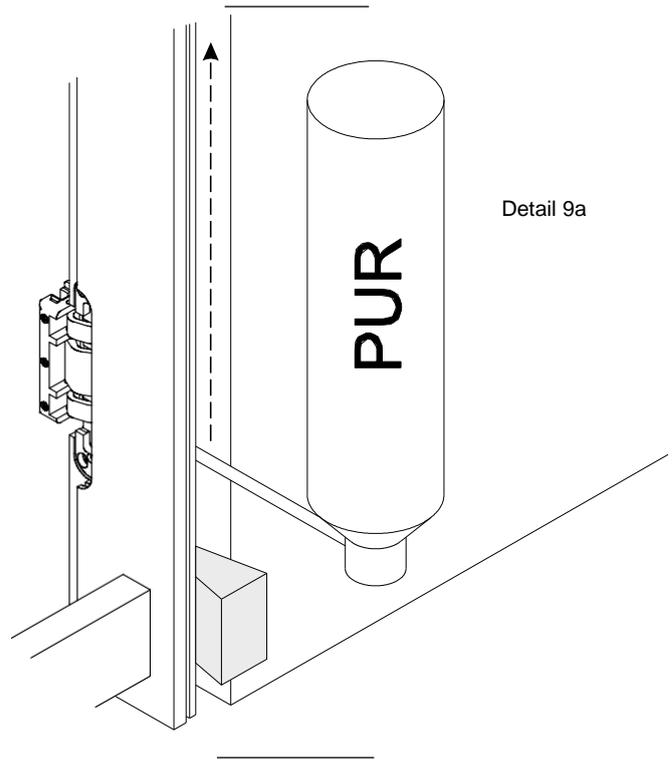

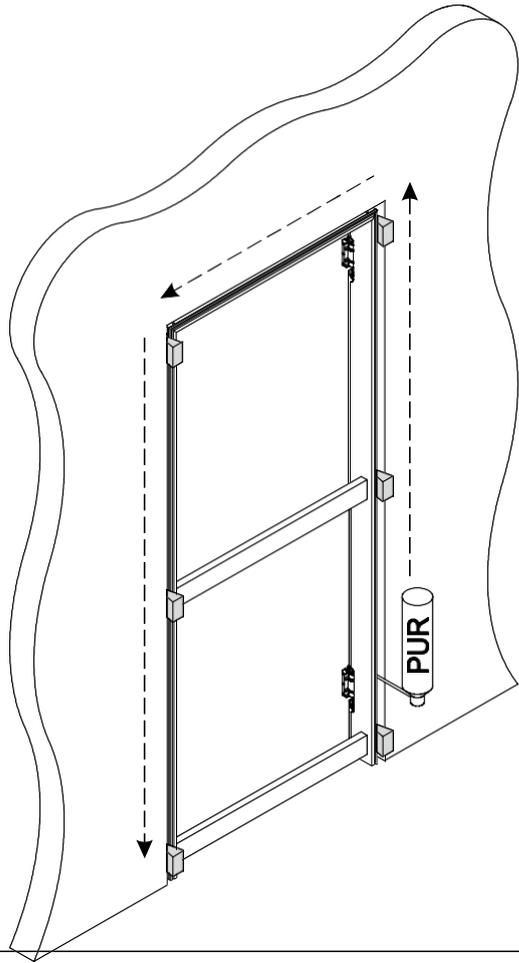

8.

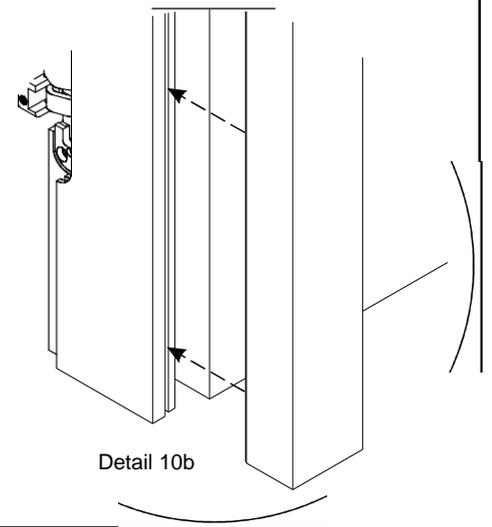

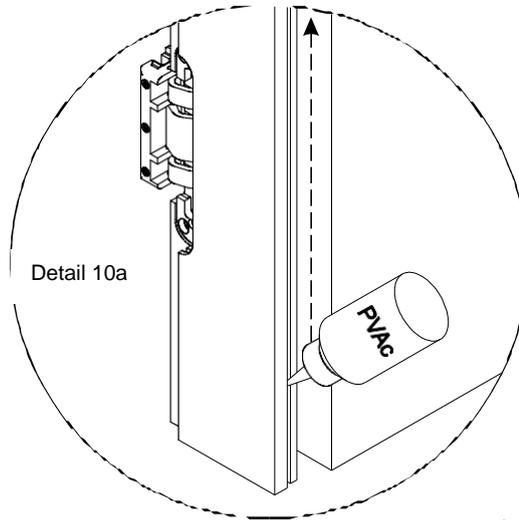

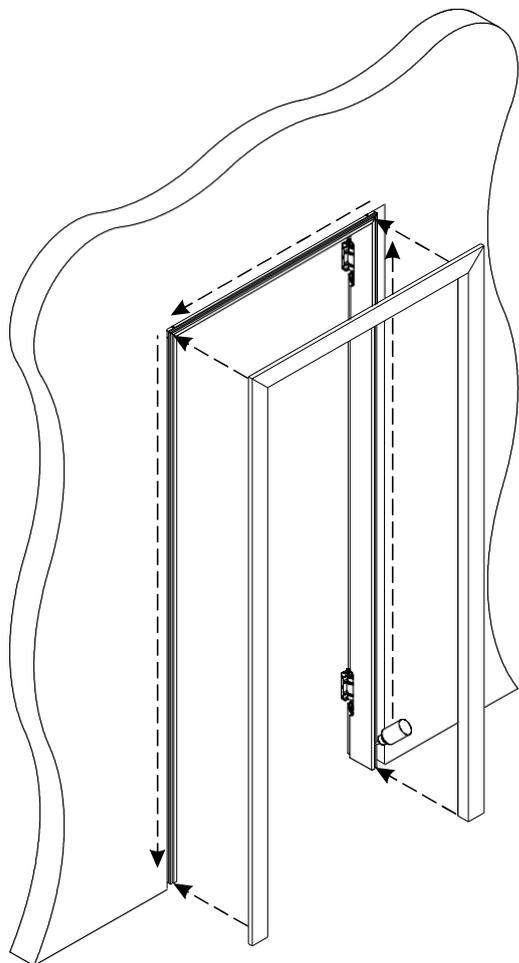

Einsetzen des Tragrahmens der Zarge in die Bauöffnung, Fixieren und Ausbalancieren

9. Ausschäumen des Tragrahmens der Zarge in der Bauöffnung in der gesamten Wandstärke und um den gesamten Umfang. (SAPELI empfiehlt die Verwendung des Zweikomponenten-PUR-Schaums Würth PURLOGIC SPRINT Best.-Nr. 0892146)

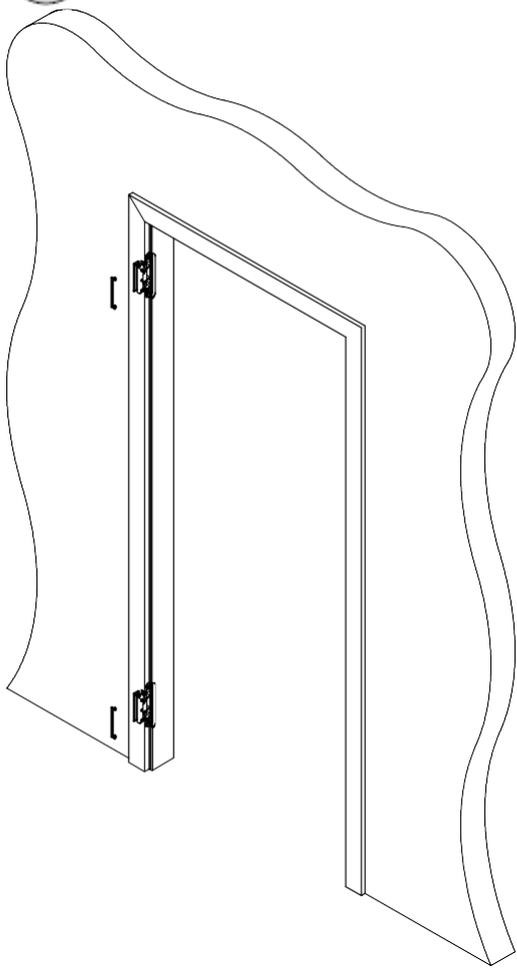

Abdecken mit dem Zierbekleidungsrahmen

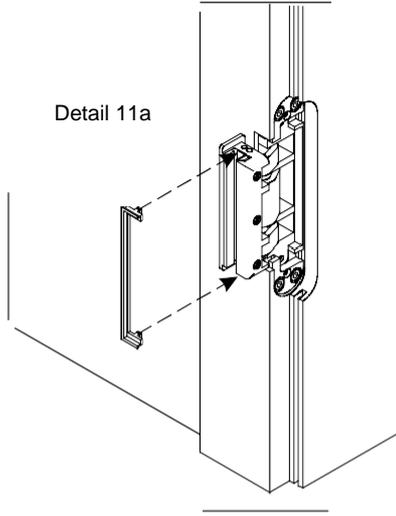

11.

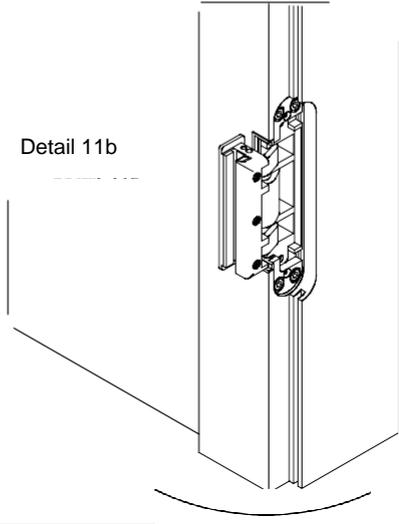

Einsetzen der Stirnabdeckung des Bands in die Aussparung der Zarge

Detail 11a

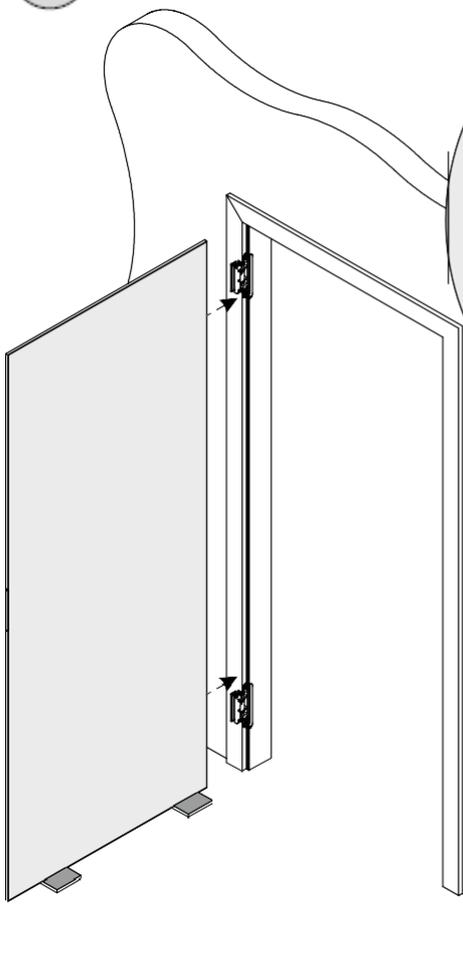

Detail 11b

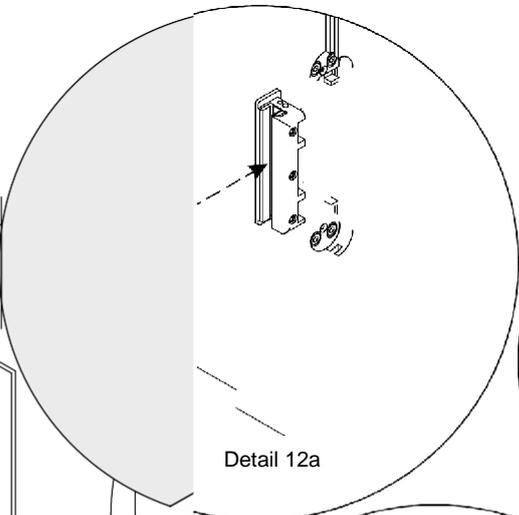

12.

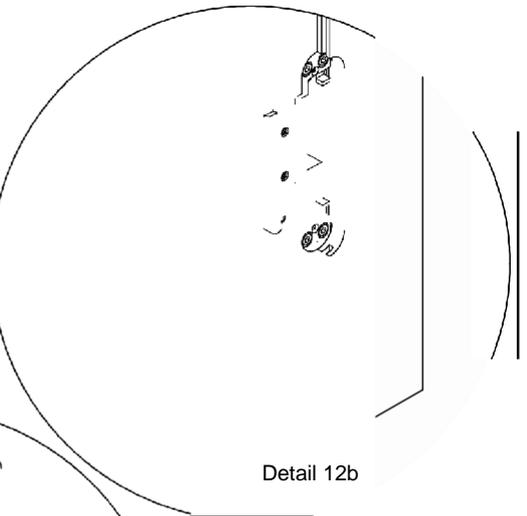

Einsetzen des Glastürblatts in die Bänder

Detail 12a

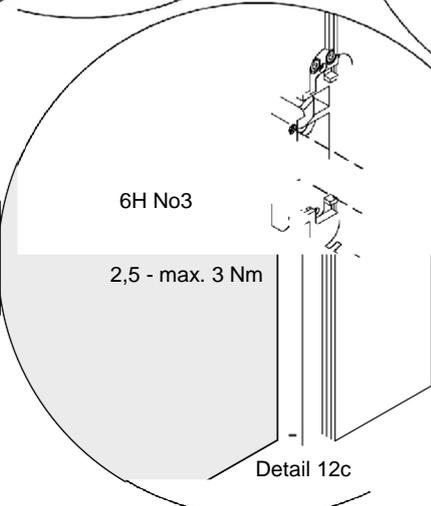

Detail 12b

6H No3

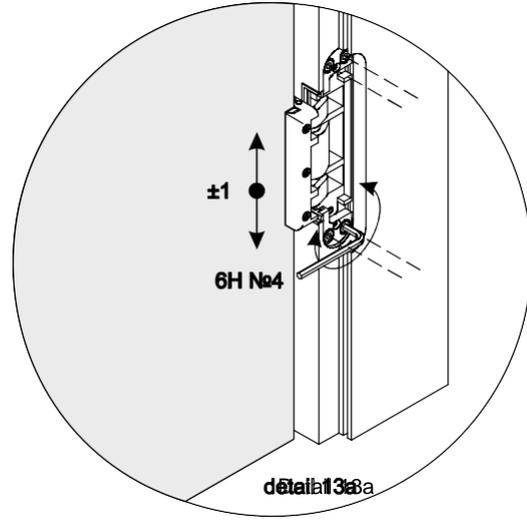

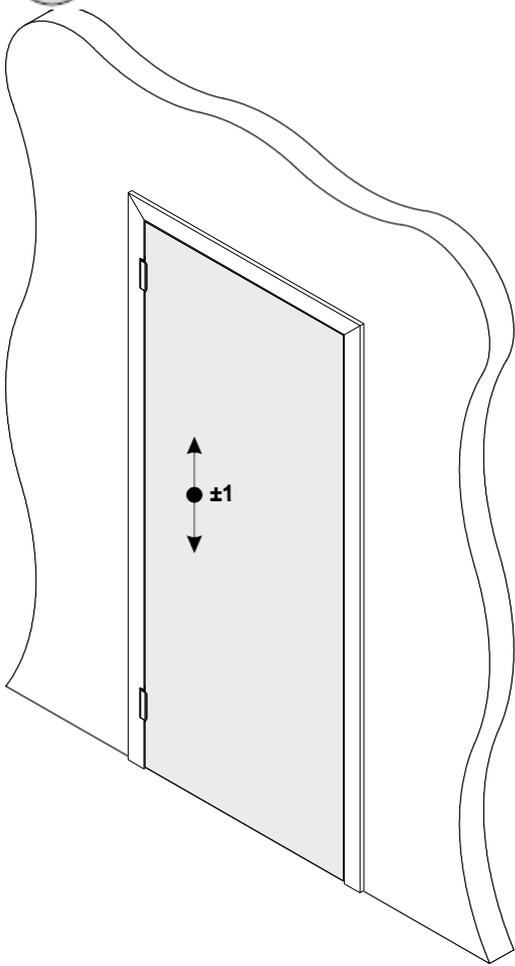

2,5 - max. 3 Nm

Detail 12c

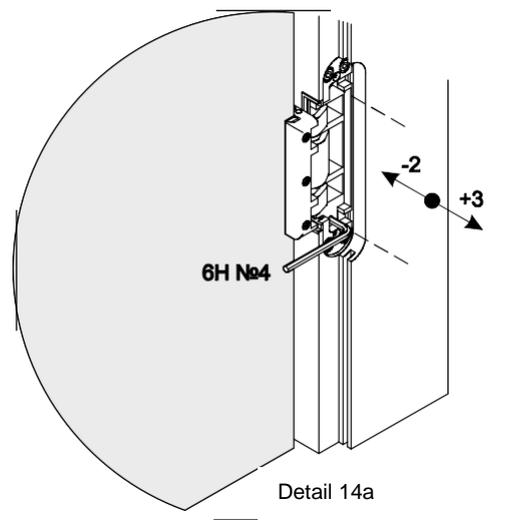

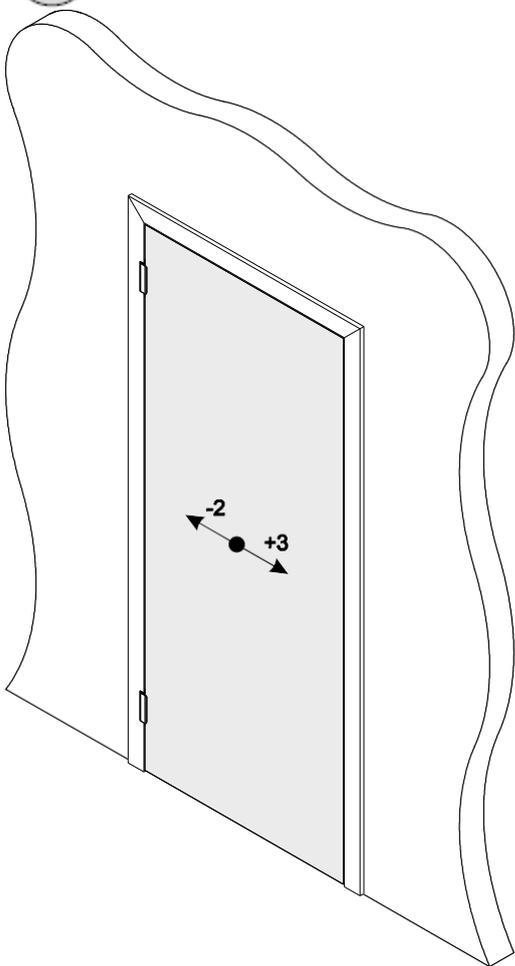

13.

Höhenverstellung des Türblatts in der Zarge

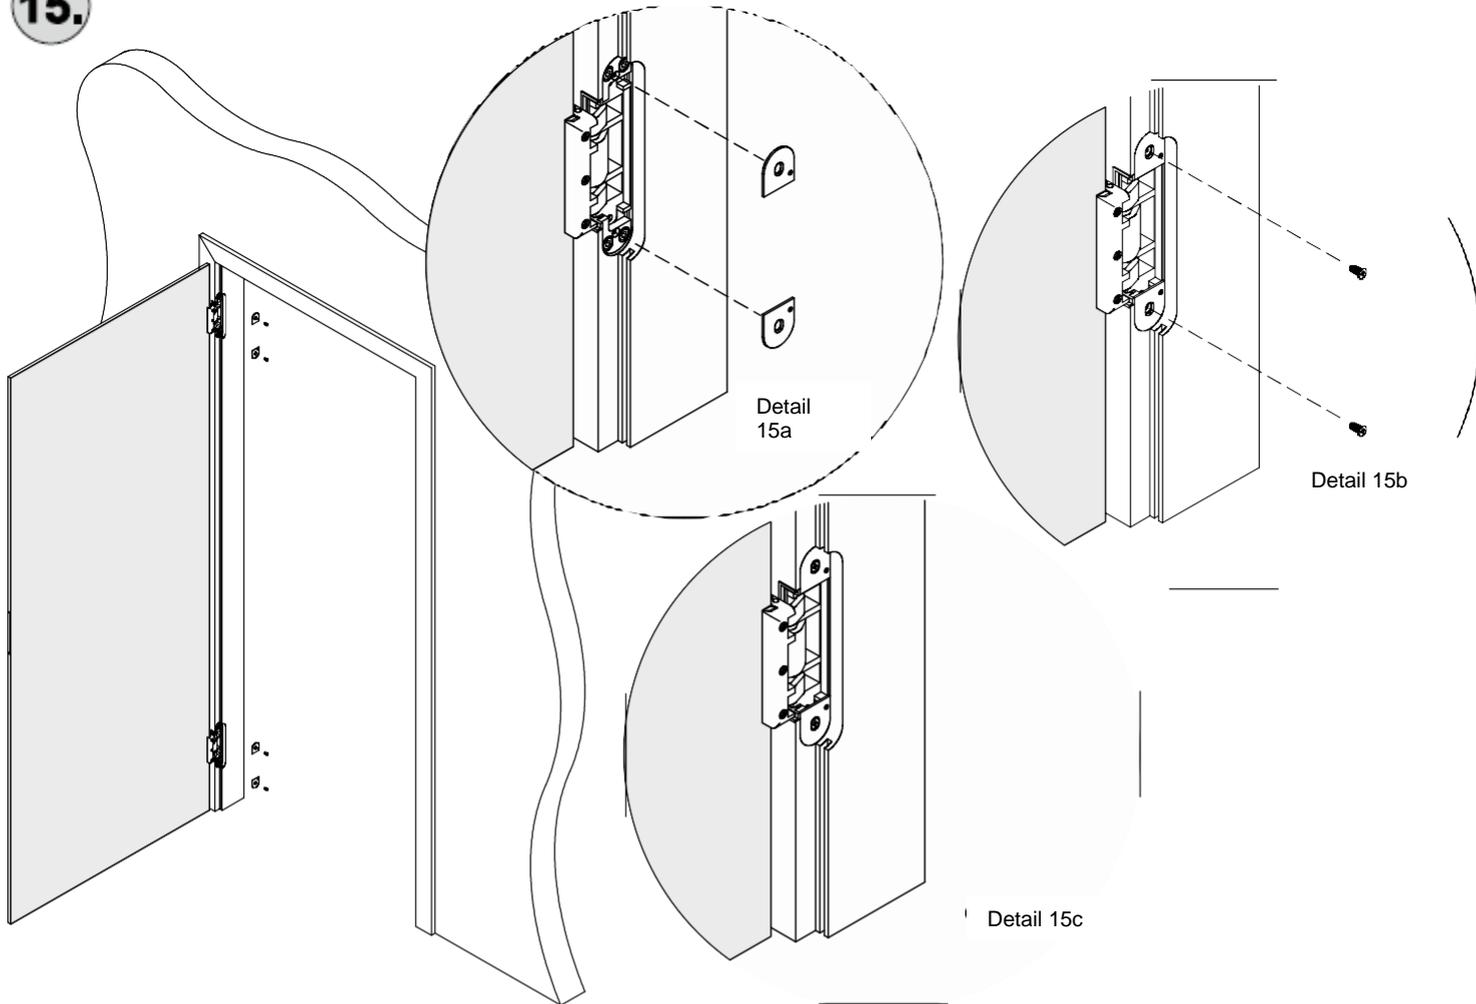

14.

Seitliche Türblattverstellung in der Zarge

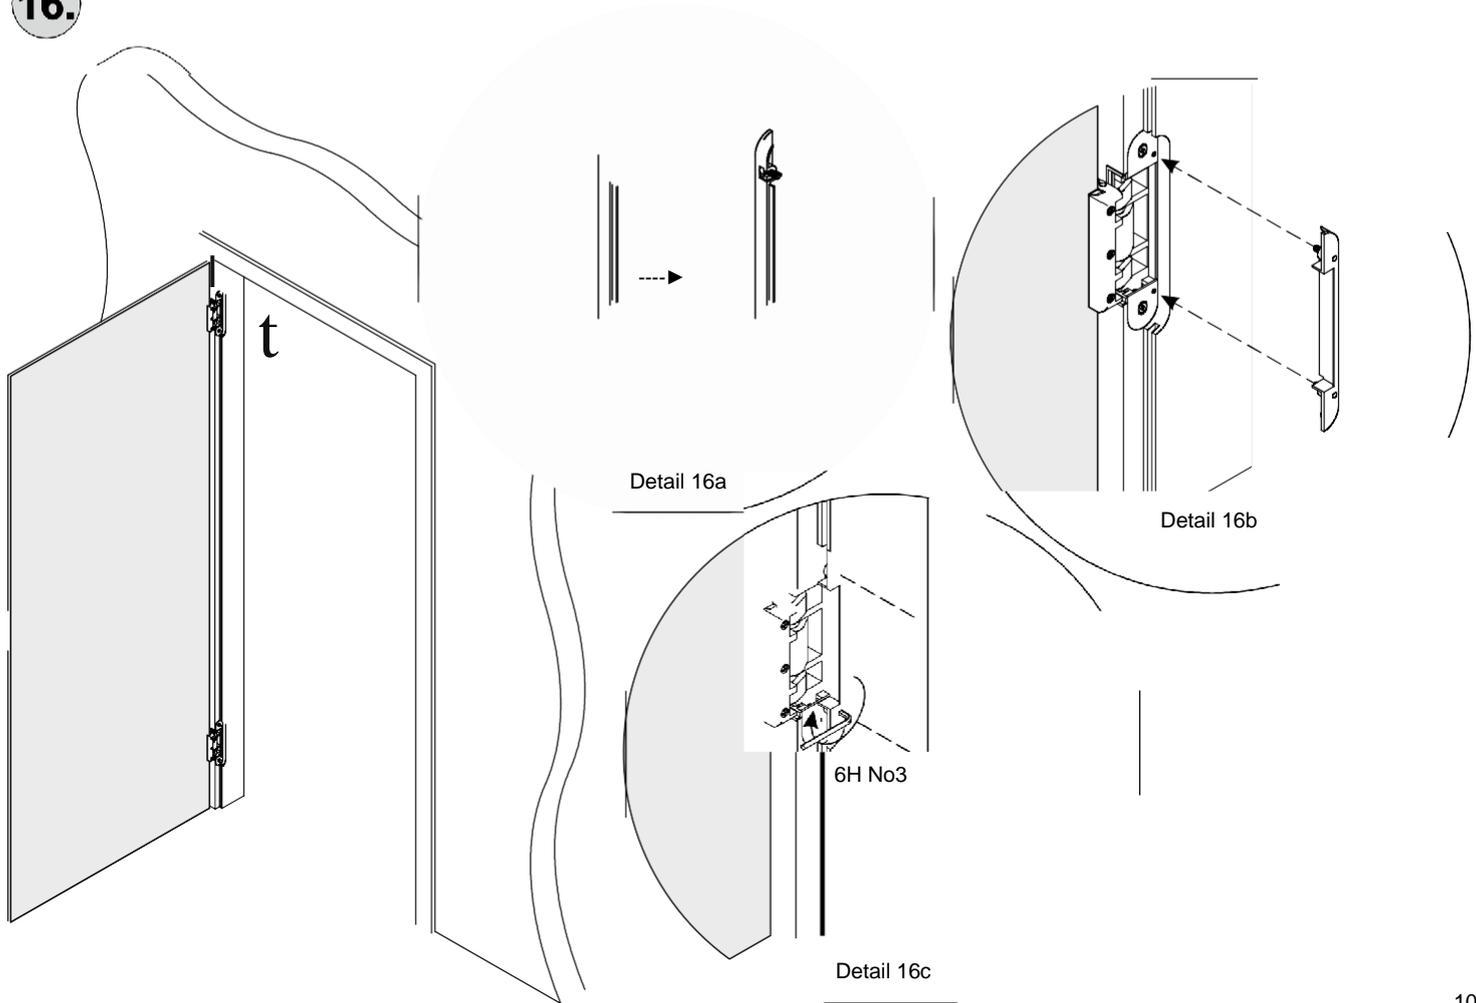

15.

Montage von Bandabdeckungen

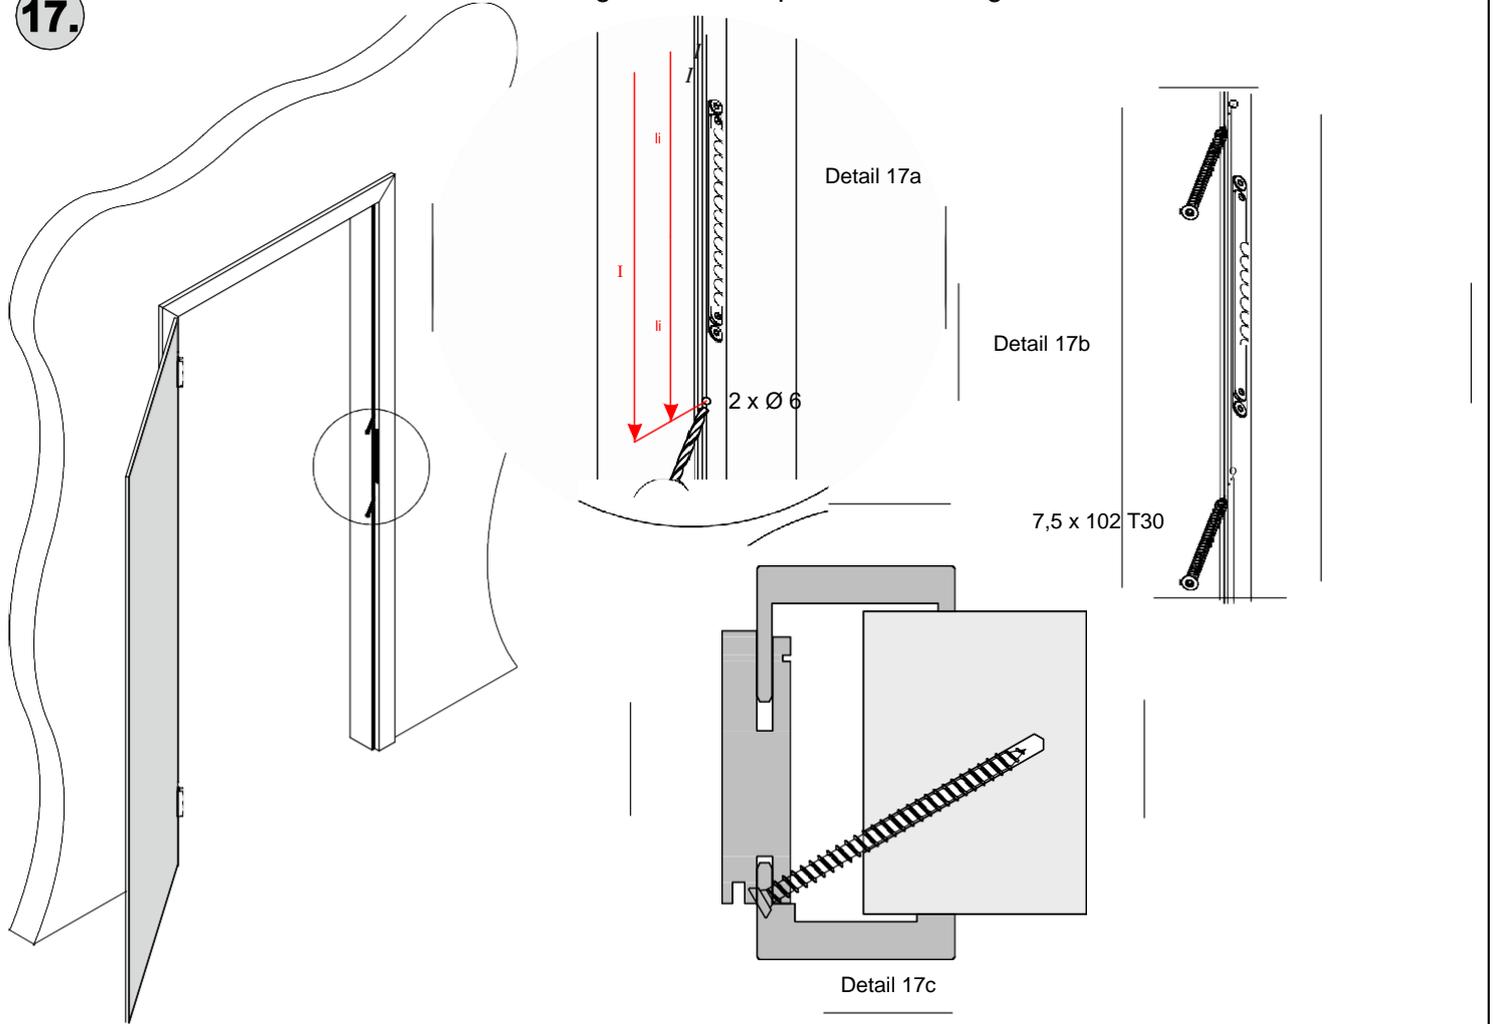

16.

Montage der Abdeckungen des Zargenfalzes

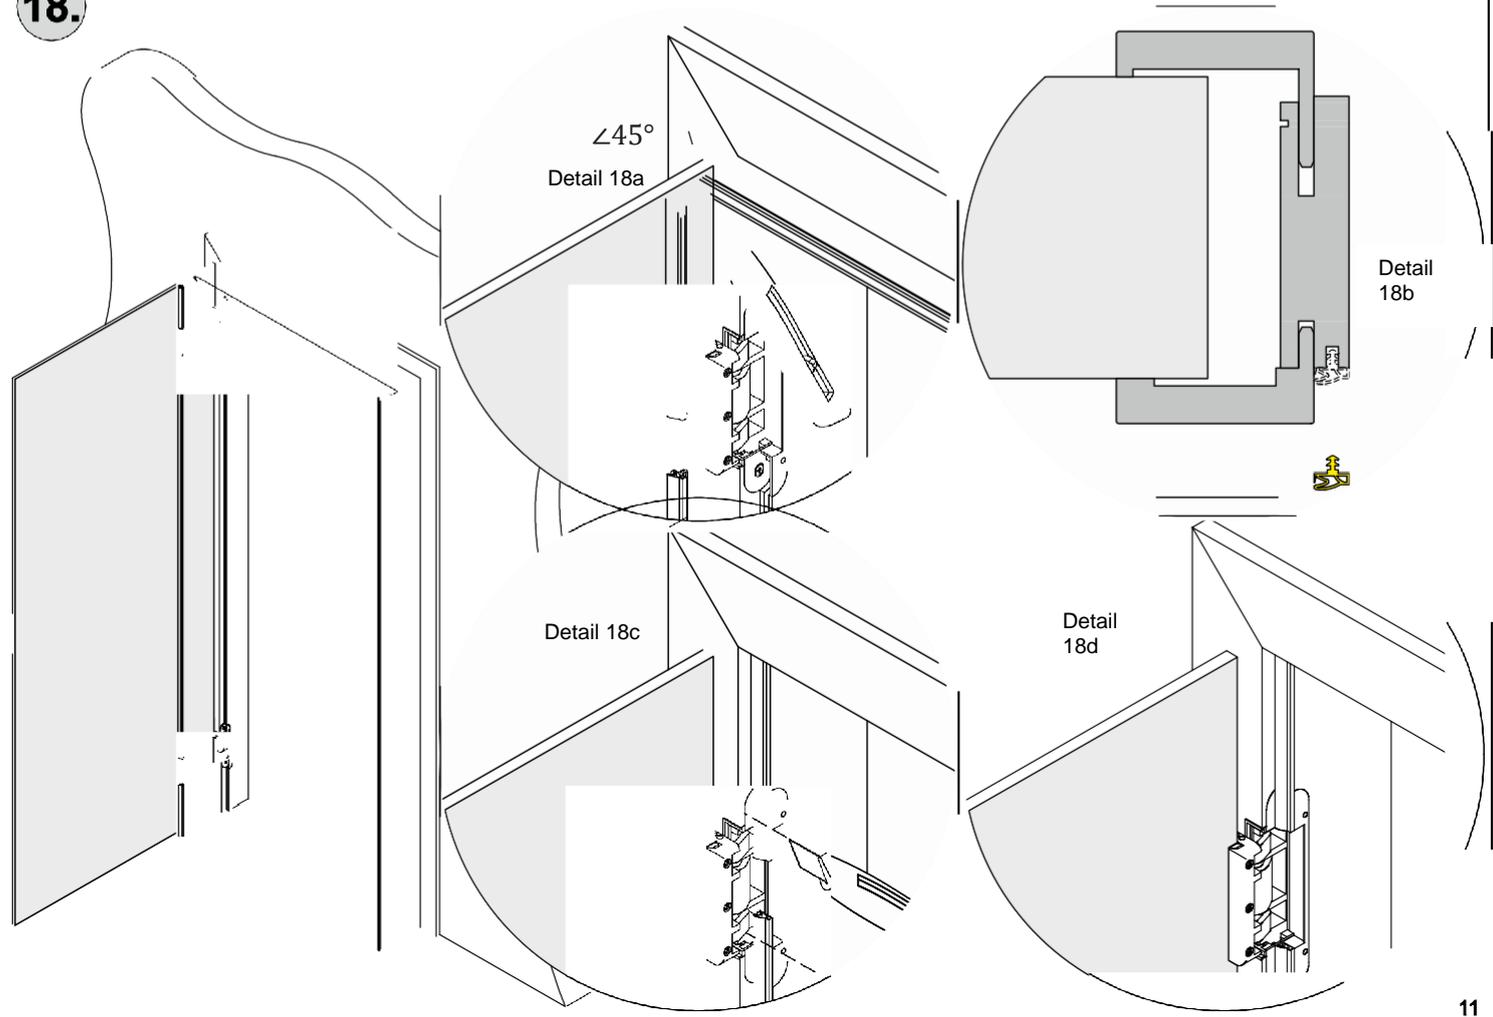

17.

Verankerung des Schlosspfostens mit Magnet

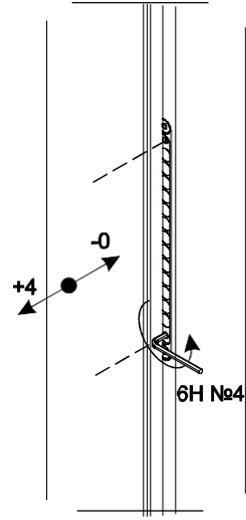

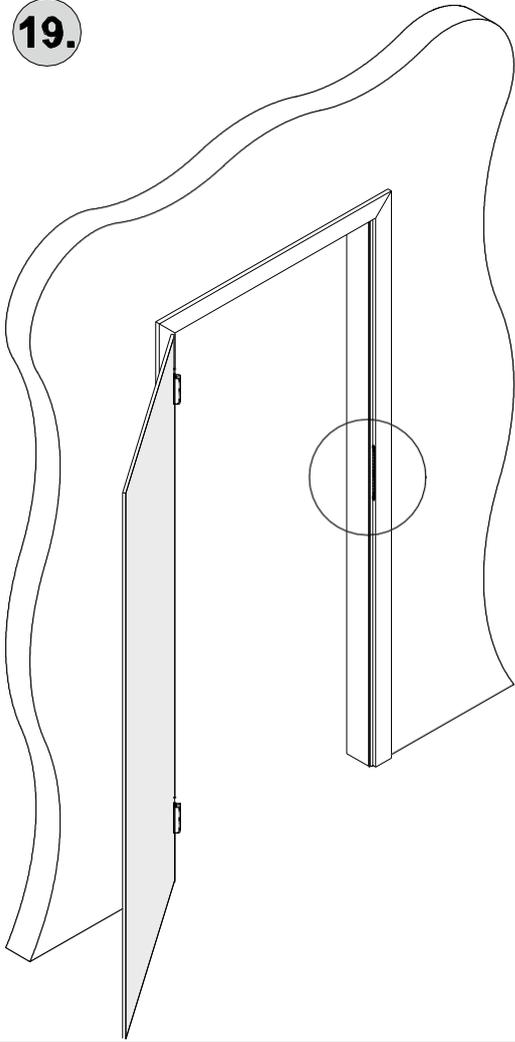

18.

Einsetzen der Dichtung in die Zarge

19.

Einstellung des Magnetdrucks durch Annäherung
